The Partners

UAE Ministry of Energy & Industry:

The Ministry of Energy and Industry is one of the main ministries of the Government of United Arab Emirates. Moreover, it contributes in achieving the UAE 2021 vision, which is represented by the national agenda indicators, and by competitiveness and strategy.

General Strategic Direction:

"The sustainability of the energy and water sector, the reduction of greenhouse gas emissions, the regulation of the mineral resources sector and the industrial sector in the country to support economic and social development in accordance with international standards with distinct human competencies "

Vision:

Sustainable and secure energy, water, and natural resources, as well as innovative competitive industries for a prosperous and happy society.

Mission:

Organizing and developing energy, water, mining and industry sectors by developing and supervising the implementation of public policies, legislations, and strategies. In addition, building partnerships in cooperation and coordination with the concerned entities. Furthermore, representing the state affairs locally, regionally and globally, as well as preparing studies and specialized research according to the best standards.

Strategic Goals

1. Achieve security and sustainability of the energy, water and mining sectors.
2. Regulate the energy, water, mining sectors and greenhouse gas emissions to support economic development
3. Sustainable Development and Integrated Water Resources Management.
4. Development and growth of national industry according to the best international standards
5. Ensuring the provision of all administrative services in accordance with quality standards, efficiency and transparency.
6. Establishing a culture of innovation in the institutional work environment

ARAB INDUSTRIAL DEVELOPMENT AND MINING ORGANIZATION:

The Arab Industrial Development and Mining Organization is an organization endowed with its own legal entity and its financial and administrative autonomy. It has been established as a result of the combination of the Arab Organization of Mineral Resources, the Arab Organization for Standardization and Metrology and the Arab Industrial Development Organization. The Arab Industrial Development and Mining Organization consists of twenty-one Arab member states.

OBJECTIVES:

- **AIDMO aims to ensure Arab industrial integration and coordination.**
- **it seeks to upgrade capacity-building in the Arab world in the field of industry, energy, mining, metrology and standards to promote production.**
- **foster productivity and develop joint industrial projects at the national and regional level.**
- **Working on the development of Arab standards to achieve quality and proficiency of Arab products and facilitate exchange.**
- **promote the inter-Arab cooperation and foster cooperation between Arab countries and developed countries.**
